High Findings (190)

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-VULNERABILITIES
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: 8 existing vulnerabilities detected

How to fix: Improve the Vulnerabilities score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#vulnerabilities>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-TOKEN-PERMISSIONS
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: No tokens found

How to fix: Improve the Token-Permissions score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#token-permissions>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-SECURITY-POLICY
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: security policy file not detected

How to fix: Improve the Security-Policy score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#security-policy>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-SAST

- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: no SAST tool detected

How to fix: Improve the SAST score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#sast>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-PINNED-DEPENDENCIES
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: dependency not pinned by hash detected -- score normalized to 0

How to fix: Improve the Pinned-Dependencies score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#pinned-dependencies>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-PACKAGING
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: packaging workflow not detected

How to fix: Improve the Packaging score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#packaging>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-FUZZING
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: project is not fuzzed

How to fix: Improve the Fuzzing score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#fuzzing>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-DEPENDENCY-UPDATE-TOOL
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: no update tool detected

How to fix: Improve the Dependency-Update-Tool score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#dependency-update-tool>

Action: Address this issue as soon as possible.

[HIGH] Using outdated libraries with known security issues.

- Scanner: scorecard
- Rule: SCORECARD-DANGEROUS-WORKFLOW
- OWASP: A06:2021-Vulnerable and Outdated Components

What's wrong: no workflows found

How to fix: Improve the Dangerous-Workflow score. See: <https://github.com/ossf/scorecard/blob/b0143fc57d8d38748990027266de715052806f4b/docs/checks.md#dangerous-workflow>

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 10 except...pass block(s) — errors silently ignored. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/dashboard/app/main.py
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 10 except...pass block(s) — errors silently ignored. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 21 await calls but only 0 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/time-travel-debug.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 21 await calls but only 0 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 13 await calls but only 2 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/digital-twin.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 13 await calls but only 2 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 20 await calls but only 2 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/agent-identity.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 20 await calls but only 2 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 10 await calls but only 1 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/constitutional-inheritance.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755

- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 10 await calls but only 1 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. 21 await calls but only 5 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/postgres-mirror.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. 21 await calls but only 5 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. Mixed error handling: 113 try/catch blocks and 20 .catch() chains. 380 await calls but only 133 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/index.ts
- Scanner: deepeval
- Rule: DEEPEVAL-002
- CWE: CWE-755
- OWASP: A04:2021-Insecure Design

What's wrong: Error handling patterns are inconsistent in this file. Mixed error handling: 113 try/catch blocks and 20 .catch() chains. 380 await calls but only 133 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] Error handling patterns are inconsistent in this file. Mixed error handling: 7 try/catch blocks and 18 .catch() chains. 72 await calls but only 25 error handlers. AI-generated code often has inconsistent error handling because different parts of the file may have been generated in separate prompts or sessions, each using a different error handling approach.

- File: packages/mcp-server/src/frontier-capabilities.ts

How to fix: Standardize error handling: use either try/catch or .catch() consistently. Ensure all async operations have error handling. Remove empty catch blocks.

Action: Address this issue as soon as possible.

[HIGH] The endpoint ALL session_collections is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

- File: packages/dashboard/app/routes_extended.py:226
- Scanner: keploy
- Rule: KEPLOY-001
- CWE: CWE-1164
- OWASP: A04:2021-Insecure Design

What's wrong: The endpoint ALL session_collections is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

Code:

```
names = cfg.get("session_collections", ["tg_sessions", "session_recordings"])
```

How to fix: Add an API test for ALL session_collections that validates the response status, body structure, and error handling.

Action: Address this issue as soon as possible.

[HIGH] The endpoint ALL /api/sessions is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

- File: packages/dashboard/app/routes_extended.py:223
- Scanner: keploy
- Rule: KEPLOY-001
- CWE: CWE-1164
- OWASP: A04:2021-Insecure Design

What's wrong: The endpoint ALL /api/sessions is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

Code:

```
@router.get("/api/sessions")
```

How to fix: Add an API test for ALL /api/sessions that validates the response status, body structure, and error handling.

Action: Address this issue as soon as possible.

[HIGH] The endpoint ALL governance_collections is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or

broken error handling that goes undetected without tests.

- File: packages/dashboard/app/routes_extended.py:216

- CWE: CWE-1164
- OWASP: A04:2021-Insecure Design

What's wrong: The endpoint ALL /api/governance is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

Code:

```
@router.get("/api/governance")
```

How to fix: Add an API test for ALL /api/governance that validates the response status, body structure, and error handling.

Action: Address this issue as soon as possible.

[HIGH] The endpoint ALL knowledge_collections is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

- File: packages/dashboard/app/routes_extended.py:206
- Scanner: keploy
- Rule: KEPLOY-001
- CWE: CWE-1164

- OWASP: A04:2021-Insecure Design

What's wrong: The endpoint ALL knowledge_collections is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

Code:

```
names = cfg.get("knowledge_collections", [
```

How to fix: Add an API test for ALL knowledge_collections that validates the response status, body structure, and error handling.

Action: Address this issue as soon as possible.

[HIGH] The endpoint ALL /api/knowledge is defined in the codebase but has no corresponding API test. Untested endpoints are a significant risk in AI-generated codebases because the AI may produce handlers with incorrect logic, missing input validation, or broken error handling that goes undetected without tests.

- File: packages/dashboard/app/routes_extended.py:203

What's wrong: Identifier 'createHash' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'createHash' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Variable 'avgDuration' is declared but never used. Unused variables should start with a '_'.

- File: packages/mcp-server/src/frontier-capabilities.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Variable 'avgDuration' is declared but never used. Unused variables should start with a '_'.

How to fix: Review this finding and apply the appropriate fix based on the description: Variable 'avgDuration' is declared but never used. Unused variables should start with a '_'.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Catch parameter 'err' is caught but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Catch parameter 'err' is caught but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Catch parameter 'err' is caught but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Variable 'tier' is declared but never used. Unused variables should start with a '_'.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Variable 'tier' is declared but never used. Unused variables should start with a '_'.

How to fix: Review this finding and apply the appropriate fix based on the description: Variable 'tier' is declared but never used. Unused variables should start with a '_'.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type alias 'TemporalClassT' is declared but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type alias 'TemporalClassT' is declared but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type alias 'TemporalClassT' is declared but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorBenchmarkRuns' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorBenchmarkRuns' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorBenchmarkRuns' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorNhiTransitions' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorNhiTransitions' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorNhiTransitions' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorNhiLifecycle' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorNhiLifecycle' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorNhiLifecycle' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorDelegationTokens' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorDelegationTokens' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorDelegationTokens' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorAgentIdentitySessions' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorAgentIdentitySessions' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorAgentIdentitySessions' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Identifier 'mirrorConsolidationCycles' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Identifier 'mirrorConsolidationCycles' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Identifier 'mirrorConsolidationCycles' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'MetaSelfAssessment' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'MetaSelfAssessment' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'MetaSelfAssessment' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'EcosystemAssessment' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'EcosystemAssessment' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'EcosystemAssessment' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'TemporalTask' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'TemporalTask' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'TemporalTask' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'GanttChart' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'GanttChart' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'GanttChart' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'TemporalPlan' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'TemporalPlan' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'TemporalPlan' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ImprovementMetrics' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ImprovementMetrics' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ImprovementMetrics' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ABTestResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ABTestResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ABTestResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'OptimizationProposal' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'OptimizationProposal' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'OptimizationProposal' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'WorkflowAnalysis' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'WorkflowAnalysis' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'WorkflowAnalysis' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ConsolidationStatus' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ConsolidationStatus' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ConsolidationStatus' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'TierTransferRecord' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'TierTransferRecord' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'TierTransferRecord' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ConsolidationCycle' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ConsolidationCycle' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ConsolidationCycle' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ImpactAssessment' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ImpactAssessment' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ImpactAssessment' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'SemanticDiffResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'SemanticDiffResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'SemanticDiffResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'PromotionResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'PromotionResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'PromotionResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'BehaviorComparison' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'BehaviorComparison' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'BehaviorComparison' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'TestInteractionResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'TestInteractionResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'TestInteractionResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'HotReloadResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'HotReloadResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'HotReloadResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'DevInstance' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint

- Rule: OXLINT-UNKNOWN

What's wrong: Type 'DevInstance' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'DevInstance' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'ModelCoverage' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'ModelCoverage' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'ModelCoverage' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'PredictionResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'PredictionResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'PredictionResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'AgentDiscoveryResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'AgentDiscoveryResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'AgentDiscoveryResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'A2ATaskResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'A2ATaskResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'A2ATaskResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'A2AAgentCard' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'A2AAgentCard' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'A2AAgentCard' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'DecayResult' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'DecayResult' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'DecayResult' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'TrailGuidance' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'TrailGuidance' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'TrailGuidance' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

[MEDIUM] Type 'PheromoneTrail' is imported but never used.

- File: packages/mcp-server/src/index.ts
- Scanner: oxlint
- Rule: OXLINT-UNKNOWN

What's wrong: Type 'PheromoneTrail' is imported but never used.

How to fix: Review this finding and apply the appropriate fix based on the description: Type 'PheromoneTrail' is imported but never used.

Action: Plan to fix this issue in your next sprint or release.

Skipped Scanners (38)

Scanners that did not run on this scan, with the reason why and how to enable them.

Scanner	Reason	How to enable
actionlint	no_matching_files	No .github/workflows directory found – actionlint requires GitHub Actions workflow files
aflpp	no_c_project	No C/C++ project detected – AFL++ requires a Makefile or CMakeLists.txt with .c/.cpp source files
axe-core	no_target_url	Add a target URL to enable WCAG accessibility testing
c8	no_test_config	Run tests with coverage enabled first (e.g., jest --coverage or c8 npx jest)
cargo-audit	no_rust_project	No Cargo.lock found – cargo-audit requires a Rust project with dependencies
cdxgen	no_matching_files	No package manifest found for SBOM generation
conftest	no_policy_dir	No policy/ directory found – Conftest requires Rego policies in a policy/ directory
cosign	no_container_image	Add Container Image in Project Settings to verify signatures
dalfox	no_target_url	Add a target URL to enable XSS vulnerability scanning with dalfox
dotenv-linter	no_matching_files	No .env files found – dotenv-linter checks .env files for formatting and security issues
fast-check	no_matching_files	No JavaScript/TypeScript project detected – fast-check requires a Node.js project
ffuf	no_target_url	Add a target URL to enable hidden endpoint discovery with ffuf
giskard	no_llm_integration	Giskard requires LLM integrations (openai, anthropic, langchain, etc.) to test for prompt injection vulnerabilities
gosec	no_matching_files	No .go files found – Gosec requires a Go project
hypothesis	no_property_tests	Add hypothesis to your Python dependencies to enable property-based testing
jest	no_matching_files	No package.json found – Jest requires a JavaScript/TypeScript project
knip	no_matching_files	No package.json found – Knip requires a Node.js project
kube-linter	no_k8s_manifests	No Kubernetes manifests found (no files with kind: + apiVersion:)
kubeconform	no_k8s_manifests	YAML files exist but none contain Kubernetes markers (kind: + apiVersion:)
libyear	unknown	_(no hint)_
license-finder	no_matching_files	No package manifest found (package.json, Gemfile, requirements.txt, etc.)
mutmut	no_python_project	No setup.py, pyproject.toml, or requirements.txt found – mutmut requires a Python project
newman	no_postman_collection	Add a *.postman_collection.json file to your project, or import your API into Postman and export the collection.
nuclei	no_target_url	Add Application URL in Project Settings to enable DAST scanning
opa	no_matching_files	No .rego policy files found – OPA requires Rego policies to evaluate
package-validator	unknown	_(no hint)_
phpstan	no_matching_files	No .php files found – PHPStan requires a PHP project
pitest	no_java_project	No pom.xml or build.gradle found – Pitest requires a Maven or Gradle Java project
pmd	no_matching_files	No .java files found – PMD requires a Java project
poutine	no_ci_config	No .github/workflows or .gitlab-ci.yml found – Poutine requires CI/CD pipeline definitions
restler	no_api_spec	Add an openapi.json/yaml or swagger.json/yaml to your project, or set openapiSpecPath on the project.
scancode	tool_not_installed	ScanCode timed out or produced no output – use license-finder for license compliance on large repos
schemathesis	no_api_spec	Add an openapi.json/yaml or swagger.json/yaml to your project, or set openapiSpecPath on the project.
socket	no_package_manifest	Socket.dev requires a package manifest file to analyze dependencies
spectral	no_api_spec	Add an openapi.json/yaml or swagger.json/yaml to your project, or set openapiSpecPath on the project.
sqlmap	no_target_url	Add a target URL to enable SQL injection testing
stryker	no_matching_files	No package.json found – Stryker requires a JavaScript/TypeScript project
zap	no_target_url	Add Application URL in Project Settings to enable DAST scanning

Recommendations

1. Schedule remediation for 190 high severity finding(s) within the current sprint
2. Update 167 vulnerable dependency/dependencies -- run npm audit fix or equivalent
